- Parking Spaces
- Association Fee
- Central Air
- Development Farm
- Gated Community
- Mountain Properties

- Acreage
- Back Up Power
- Close To Schools
- Fully Landscaped
- Internet
- Mountain View

Property Description

Alba Nueva redefines modern living by combining thoughtful design with sustainability. The home's multi-level structure optimizes construction efficiency and material use while incorporating repetitive façade elements inspired by rational geometry. These geometric forms are further enhanced with strategically placed openings that frame breathtaking views and create dynamic interior spaces. Natural ventilation and daylighting are central to Alba Nueva's design. Carefully positioned openings ensure constant airflow, while large glass panels with solar-reducing properties keep interiors cool. A natural wooden screen provides additional shading and airflow, blending functionality with elegance. Water conservation is seamlessly integrated with rain gardens that filter and recharge water onsite, promoting sustainable use of this vital resource. Sustainability Features: • Multi-level design reduces construction costs and material use through optimized geometry • Strategically placed openings ensure constant airflow and maximize daylighting • Large glass panels with solar-reducing properties maintain cool interiors and reduce energy use • Natural wooden screens provide shading, privacy, and additional airflow • Rain gardens filter and recharge water onsite, promoting sustainable water use • Locally sourced materials reduce environmental impact and support regional economies • Low-VOC paints and sealers improve indoor air quality for a healthier living environment For more information on this amazing opportunity please do not hesitate to contact Surfing Nosara at info@surfingnosara.
